

ANTIQUe MIRROR GLASS

Saligo Design offers a range of hand-finished antique mirror glass styles to suit most applications. If you have a particular requirement for antique mirror glass not met by any of our styles, please contact us and we'll see if we can source or develop an appropriate style for you.

All our mirrors are made to order. We usually recommend 6mm thickness glass, or 4mm for small panels, though we can provide thicker dimensions for applications like kitchen work-tops, for example.

To meet health and safety requirements, mirrors are safety-backed or toughened depending on the application. Toughening is slightly more expensive, but it does provide greater protection from breakage. Edges are usually polished or bevelled to specification, and different colours of glass are also available.

For wall panels, we generally advise that mirrors are fixed directly (and permanently) to the wall with mirror adhesive. If required, holes, cut-outs for sockets and curved edges can be incorporated into the glass prior to the silvering process. We also provide hand-crafted chrome barrel fixings for individual panels and our bespoke lead-framed designs.

Typically, we offer supply-only solutions with delivery across the UK, but we can provide survey and installation services in London and Surrey. Our lead time for supply is 2-6 weeks depending on the specification of the job.

Prices and samples are available on application. Feel free to call us on 020 7100 4333 for a quotation.
